Terminal City Labor Party Decide Against Union With Liberals.

Mass Meeting Called By Loggers to Consider the Situation.

Building Operations Brought to An Abrupt Termination By Mill Men.

From Our Own Correspondent.

Vancouver, July 8.—It has been announced that the Labor party will not unite with the Liberals. The Labor convention did not select candidates at their recent meeting, but they formed a platform, which was very short, as follows: That candidates or members elected by the Labor party will consider if legislation offering is in the interests of the working class; if so, the candidate will support it; if not, the party will oppose such legislation. The Labor party will nominate three candidates, and with two socialist candidates, will make a complete ticket of five.

There is once more an agitation on foot to raise the wreck of the steamer Beaver, now lying beneath the waters of the Narrows.

A public mass meeting is talked of for the purpose of discussing the logging situation. The loggers claim that owing to the lack of demand, the situation is a very serious one. The idea is to have mill men and loggers express their views on the question at this meeting.

Mr. Walter A. Clark, of California, who is largely interested in the Similkameen country, and also in Nicola, is in Vancouver. He says he is astonished at the mineral showing of the Similkameen. Given railway facilities, he says, it will speedily become a wonderful camp. The strange thing about it is to see the mines of copper, gold and silver, and the great concentrations of gold and agricultural country, with one of the finest climates in the world. Grass grows in the valley that will hide an animal when it lies down, it is so rank; and not half a mile away are great ledges of copper-gold rock on the mountain side.

A committee are hard at work arranging for the Scottish games on August 1.

Messrs. Reddell, Snyder and Eber are locked up charged with robbing Max Cetochin of \$300, the amount having been taken from his pocket while he was drunk.

A great many Indian women were on the streets yesterday selling baskets. They did a great trade with the tourists.

The waters of the Inlet and False Creek were alive with whiting yesterday, and amateur fishers were out in large numbers.

The four baseball teams of the city formed a league last night.

Lieutenant Commissioner Brown states that up to the present time he has issued 2,200 bicycle tags. The regular supply is almost exhausted, but he thinks he will have enough to cover the demand until the extra supply is received.

An extension to the telephone company's switch board has been received. It has a capacity of 300. The original switch board is filled up.

The date of the Vancouver flower show has been postponed for three weeks, owing to the unsettled weather.

The annual swimming races will take place at English Bay this month. There will be a junior and senior championship for British Columbia, the prize for the latter being a gold medal, valued at \$200.

The baseball team is reorganized under Manager Cohn, and Port Angeles and Everett baseball teams will play here shortly.

Application to further postpone the trial has been refused by Judge Henderson. The trial takes place Thursday.

There are no fish running yet. The Japanese have asked for 16 cents a fish for July and 15 cents for August. The cannery have refused their demands. The cannery intimates that they will hold no more negotiations with the fishermen regarding the price of fish.

Mr. H. O. Bell-Irving has been appointed delegate from the Vancouver Board of Trade to the Congress of Associated Chambers at Montreal.

A large consignment of apples and pears from California have been condemned by Fruit Inspector Cunningham. They were infected with San Jose scale.

It is reported that 2,000 men are to be put to work on the Britannia mines, on Howe Sound. The mines have fallen into the hands of the Heinzens, one of the wealthiest copper rings in the world. This week arrangements will be made with the immediate commandant of work on large scale. The property has cost the Montana people \$4,000 in cash. A tram is to be constructed, capable of taking 2,000 tons of ore a day to tide water.

The company will at once commence the construction of a smelter to treat this ore. The coal will be secured from Comox.

Building operations in Vancouver were abruptly terminated at 5 o'clock this afternoon owing to the refusal of the mills to supply contractors with lumber. Some of the contractors will suffer heavy financial loss.

The final test was to the United States navy, in which the mayor cordially welcomed the visit of the United States European squadron to Portsmouth as being further proof of the friendly relations of the United States and Great Britain.

Another 800 Americans were guests at the luncheon. The procession to and from the hall was attended by the band of the Kearsarge. The Americans were welcomed with immense enthusiasm by the assembled crowds.

Portsmouth, July 8.—The American squadron's final day in British waters has ended as handsomely as began.

Admiral Cotton and the American captains at dinner last night, the junior officers of the British vessels were dining on board the British gunnery ship Excellent.

The English and American ships were illuminated in the evening.

The dinner given by Admiral Hotson was characterized by considerable wine and beer. There were a few formal toasts, except those to King Edward and the President of the United States, and no set speeches.

Admiral Cotton received a despatch from King Edward welcoming him to England.

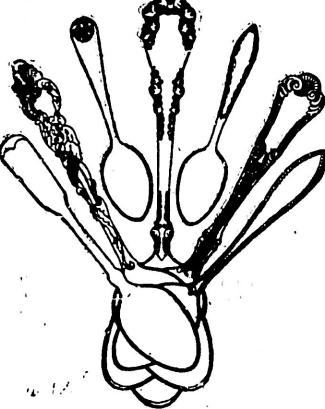

Washington, July 8.—The United States Navy Department has decided to allow the English gunnery ship Excellent, which had been in port for a month longer than was intended in English waters. Orders were sent today to Admiral Cotton to leave England in time to arrive in Lisbon on the 22nd inst., which will involve his sailing on the 17th. The Kearsarge is authorized to remain in England until that date.

A number of private members clauses were then submitted and discussed at length. Mr. Wyndham pleaded that the House complete the committee stage of the bill this evening, and all these clauses were then withdrawn. Mr. Wyndham then moved an amendment to the bill, which was agreed to, although the landlords of a uniform bonus of 12 per cent. This was agreed to, although the Nationalists plainly intimated their intention of re-opening the question on the report. The bill was amended then passed through the Committee stage and was reported to the House amid cheers.

THREE DEATHS FROM HEAT.

Chenglo, July 8.—Three deaths and a number of prostrations were reported to the police today as a result of the heat. At 2:30 p.m. the government thermometer registered 93 degrees, which is the highest so far this year.

LORD MAYOR OF LONDON.

Who Has Been Decorated by President Loubet of France
With the Legion of Honor.

LORD MAYOR SAMUEL
Sketch Made At a Recent Function At Which Sir Marcus Wore His Official Robes

Leo's Grave Condition

Latest Bulletin From the Vatican Shows That Crisis Approaches.

Not Expected That His Holiness Would Live Through the Night.

Sudden Death of Cardinal Volponi Secretary of the Consistory.

Rome, July 8.—While the Pope lies on his death bed, the finger of death seems also to have touched one of his intimate friends, Mgr. Volponi, whom he told the other day was appointed secretary of the consistorial congregation. Mgr. Volponi was stricken with syncope today. He fell to the floor, but was carried to his apartment, and Dr. Lapponi was hurriedly summoned from the Pope's bedside.

The official bulletin of the Pope's condition was issued at 8:15 this evening, as follows:

"The remainder of the day has passed without recurrence of fainting attacks.

The pulse is less frequent, but little more regular. The breathing is easier.

The disease was so clear and well defined that the prognosis of the disease is not possible in the nature of the disease to detect it early, nor was it prudent,

considering the age and weakness of the Pontiff, to risk a test puncture.

However, the criticizing cardinals not

only maintained their view, but succeeded in reaching the ear of Cardinal

Lapponi, Mazzoni.

Rome, July 8—10:15 p.m.—As the evening approached the Pope's condition grew greatly worse, and there is no doubt that he will pass away during the night.

Rome, July 8.—Although Pope Leo is one of the best loved of the popes, the situation in the church is now, that while there is one party which would do anything possible to have him longer, there is another party which thinks a change in the papacy would further their interests as well as those of the church.

The former party is composed of all the friends of those who are now in the lead.

Those who have secured the best positions will be urged to have him longer, and those who have secured the best positions as well as financially.

These understand that a change may mean practical oblivion for them. The other party is composed of all those who have been kept in the background and whose only hope is a new administration.

It must be considered that a new pope generally brings a change in all the great departments, especially in the papal secretary of state and vice-regal.

The representative of the papacy in spirit, the Italian affairs and vice-chancellor, who has charge of issuing the papal bulls, the grand penitentiary, who presides at the tribunal of penitentiaries, granting absolution under certain circumstances, and the librarian of the Holy Church, besides all other positions more or less important contained with or depending on these great dignitaries.

There is only one man who holds such a position as to be sure to produce an election.

It is to be hoped that the new administration will not only take the oath of allegiance to the King and to support the constitution, but he will be sworn to obey the Italian laws, including the papal guarantees which regulate the position of the papacy in regard to the Italian state, thus making him obnoxious to the papal party.

It is his duty when a pope is elected to advance, kneeling, and offer the white succette or small cap, the emblem of papal dignity to the new pontiff who is expected to remove his red cap and put the white one on his head, while kneeling to the officiating monsignor, as a sign that he will soon assume his cardinal.

On such an occasion, in 1878, Leo calmly and slowly folded up his red cap and put it in his pocket, as a mute protest against politicians. The officiating prelate was Mr. Lazagni, who, in fact, waited about three years before entering the sacred college. The fortunate prelate who is now looking forward to such a dignity, is Mgr. Volponi, who has just been appointed secretary of the consistorial congregation as a reward, perhaps, for his past Latin, which had not been to the disposal of the Pontiff for so many years.

Paris, July 8.—According to a despatch from Rome to the Echo de Paris, Cardinal Oreggia has ordered the apartments in the Vatican which are occupied by the Camerlingo, which post he himself holds, during an interregnum, to be prepared. Cardinal Rampolla, on learning of this, declared the action not to be decent while the Pope was still living, and ceased his own work. The incident, says the despatch, has caused much comment.

Winnipeg, July 8.—The Synod of the Diocese of Rupert's Land met in

Aid to Iron And Steel Industry**Government Proposes Fifteen Per Cent Addition to the Bounty.****Assistance Given to Importers of Twine Fibre From the Philippines.****From Our Own Correspondent.**

Ottawa, July 8.—The government tonight submitted to parliament a proposal giving a bounty of three-tenths of a cent per pound upon binner twine and twine fiber imported from the Philippines. This is to offset the export duty on fibre from the Philippines imposed on all countries except the United States.

The iron and steel industry is aided by 15 per cent increase in the bounty, which this year, as a result, will be \$2.70 on pig manufacture from Canadian ores, and \$1.50 on pig manufactured from foreign ores. Certain classes of manufactured iron products seen to be given a bounty.

Capt. Berney is certain that the government this session will vote him \$80,000 for his North Pole expedition. The public has subscribed \$40,000.

The Interim Supply bill passed the Commons tonight.

The Canadian Telephone bill was talked out of the Railway Committee this morning, at the instance of its rival, the Bell company.

The Railway Interim bill was under discussion in the Commons all day. Blair conceded to the demands of municipalities by allowing the municipal telephone systems to get access to railway stations, a privilege heretofore refused.

The Queen's College bill was withdrawn from the Private Bills committee this morning. The promoters take another year to consider the matter in accordance with the wishes of the General Assembly of the Presbyterian Church in Canada, expressed at Vancouver a few weeks ago.

Mr. Barrett received a cablegram from Cardinal Rampoli today that the Holy Father's condition is still most serious.

Lee Hung, a Montreal Chinaman, was arrested here this afternoon for threatening to kill Mark Yone and Lung Sit, two Ottawa Celestials. His accusers say he belongs to the highbinders society and they want him hung over to keep the peace.

McInnes and Gilmore left for home today. Stewart Henderson will go on Friday. Wilson and Green are expected tonight.

BOOT AND SHOE FAILURE.

Boston, July 8.—The assignment of the boot and shoe manufacturing firm of Ara Susman & Co., of Boston and Auburn, Maine, was announced today. The liabilities are estimated between \$400,000 and \$500,000. It is thought the assets will exceed the liabilities.

REPORT DENIED.

Horta, Azores Islands, July 8.—The United States battleship Massachusetts and the converted yacht Mayflower, accompanied by the colliers Caesar, Sterling and Lebanon, arrived at Fava yesterday and reported all well on board. This disposed of the report which gained circulation at Newport News on Sunday last, that the Massachusetts had been blown up.

THE B. C. DELEGATION.

Ministers Reach Toronto on Their Way to Ottawa.

Toronto, July 8.—A delegation of officials of the new British Columbia government are in Toronto en route to Ottawa. In the party are Robert E. Green, provincial secretary and minister of mines; Charles Wilson, president of the council; and their secretaries, and R. E. Gosnell, the well known newspaper man. The purpose of their visit is to protest against the Dominion government's disallowance of British Columbia's repeated legislation against undesirable immigration.

THE ALASKA BOUNDARY. Canadian Expert Examines Charts on the American Case.

Washington, July 8.—Jos. W. Pope, the Canadian expert in connection with the Alaskan boundary controversy, who has also been named as principal assistant to the Canadian agent, in the preparation of the Canadian case for submission to the commission, which will meet in London in September, called at the State Department today and began the examination of the originals of some of the important charts to be presented by the American side in support of its case.

ANDREW GAULT DEAD.

Canadian Merchant Prince Dies After Lingering Illness.

Montreal, July 8.—The death occurred this morning at Georgeville, Que., of Andrew Frederick Gault, president of the Gault Brothers Ltd., Decatur, who had been ill from diabetes since the time he deceased, who was a millionaire, was born in Ireland in 1833, and for many years had been prominent in business circles. He served as a director on a number of banks and insurance companies. He was a prominent Anglican and built the Montreal Diocesan College in 1896, at a cost of \$150,000, and presented it to the bishop.

ENGLISH LEAD FAMINE.

Speculators Turn Their Attention to Investment in Metal.

New York, July 8.—The Herald's special cablegram says: The attention of speculators is being turned toward lead by certain financial newsmen. There is not the least doubt that this country is on the verge of a lead famine. Speaking roughly, the annual consumption of lead in Great Britain is 25,000,000 of which only 25,000 is produced in British mines, the balance being imported chiefly from Australia, and in a smaller degree from Spain. Now the Australian mines have to be shut down. There is the prospect of a shortage of about 100,000 tons for the year. The public, being rather of gold, silver, and the copper mining propositions, at the moment may take more kindly to lead, but where is the lead to come from?

Sees The Light of Another Day**The Dying Pontiff Still Lingers With His Life in the Balance.****Spoke Little And Seemed Some-what Depressed During the Night.****Africander Again Breaks Record****Once More the Wonderful Three Year Old Sets a New Mark.****Captures Realization Stakes at the Sheephead Bay Track.**

Rome, July 9.—1:15 a.m.—The life of Pope Leo continues to hang by a thread, with the expectation that any moment may bring the final catastrophe. Yet the wonderful vitality of the remarkable old man is combatting a complication of diseases which would endanger a strong man in the prime of life. Mgr. Volponi, one of the Pontiff's most intimate friends, is lying in a serious condition as a result of an attack of syncope that he suffered today. Pope Leo, asked several times why Mgr. Volponi has not been to see him, throughout the day the reports from the sick room has alternated with fears and hopes.

Dr. Lapponi confirms the diagnosis made by the other physicians, viz.: an inflammation in the lung, which was defined in the medical bulletin as pulmonary hepatization. The original treatment was continued, consisting of supporting the strength of the heart and general condition of the patient.

No noticeable change was observed until Monday evening. It was then found that the lowest part of the right of the thorax, which previous to expiration had become impervious, affecting the function of the lung. The presence of liquid was suspected. The Pontiff spent an agitated and sleepless night. On Tuesday many symptoms confirmed the presence of liquid. Its increase was considered to account for the Pope's general growing worse. After a test puncture, 800 grammes of

BIG FRISCO FIRE.

San Francisco, July 8.—The carriage and wagon repository of Studebaker Bros., at Market and Taft streets, was destroyed by fire early today, causing a loss estimated at \$200,000.

**AFRICANDER—Winner of the Suburban Handicap and Realization Stakes, at Sheephead Bay.****CHAMBERLAIN GREETS COLONIALS****Urge Closer Union of the Present Atoms of the Empire.**

blood liquid was extracted. The condition of the patient improved immediately, thus reviving hopes, slight in some respects, and exaggerated in others. The amelioration in the condition of the patient was not continued during Tuesday; indeed, depression gained the upper hand.

Bulletin—2:25 a.m.—The Pope is asleep. The condition of his lungs is no worse. There is as yet no suspicion of serous gathering again in the pleura, but the disorder of his kidneys is disquieting. During the early part of the night His Holiness was somewhat restless. The occasion of his brief periods of sleep were disturbed by difficulty in breathing. The less bass note of the Pope's voice did, however, confirm the Pope's health. The Pontiff spoke little, and seemed much depressed. Chloral and caffeine were administered with good effect. About sunrise the Pontiff fell into a more restorative sleep than he had all night.

BRIGHTON BEACH TRACK.

New York, July 8.—B. H. Higgins, Waterboy, carrying 124 pounds, won the Brighton handicap race at Brighton Beach track, and broke the record for the distance, a mile and a quarter. Roe-Hampton was second, and River Pirate third. Waterboy's time was 2:03 1/5.

PILGRIM CLUB TO HONOR AMERICANS**Officers of the Visiting Squadron to Be Entertained Today.**

London, July 9.—The luncheon which members of the Pilgrim's Club will give to the American officers tomorrow, will be one of the most interesting functions of their visit to England. Such a number of representative British and American officers have seldom been seen together, all in uniform. Dr. Andrew-Lyon, the British representative to the American officers, the representative to Mr. Chamberlain, who received them warmly, and expressed regret that he could not visit each country, but nothing pleased him better than to meet colonials.

I do not expect to live to see my dearest hopes entirely fulfilled, but this will come. Let us be patient factors in bringing it about, thus ensuring the gratitude of generations of British, and in this great empire to the world.

Sir Gilbert Parker, the representative to Mr. Chamberlain, who received them warmly, and expressed regret that he could not visit each country, but nothing pleased him better than to meet colonials.

A committee of the Royal Medical Society of Germany having been appointed to consider the question of the best methods of reviving those apparently dead from drowning found rolling, combined with pressure on the back, was strikingly efficient. The committee considered that the best and the easiest way of applying pressure on the back with the subject placed prone, should hold a prominent place in all the recommendations for the resuscitation of such persons.

Twenty cases of maguey cutting and rattan shirts, all the latest styles and patterns, just to hand. B. Williams & Co.

Lover's Y-Z (Wise Head) Disinfectant Soap. Powder is better than other soap powders, it also acts as a disinfectant.

Soft, mellow flavored Whiskey produced by age and high quality.

VICTORIA DAILY COLONIST, THURSDAY, JULY 9, 1903.

Victoria's Popular Store**The Westside**July 9th
1903**SUMMER SALE REMNANT DAY**

On FRIDAY we'll give special attention to remnants, odds and ends, etc. The small lots, incomplete assortments, soiled or matted goods, and any lines we want out of our way before this Summer Sale closes, are to be dealt with in a way that will make short work of their existence here. Where quantities are too small, they'll go on sale without newspaper mention. These columns merely tell of the lots of which liberal quantities remain, and from them you glean ideas of the price-cutting that will prevail. It goes without saying that there'll be rare bargain-hunting for shoppers who come to the store and keep their eyes open, and those who come early will fare better than those who wait.

Obstructions
In The StreamsFish And Game Club Consider
Measures to Improve
Conditions.Executive Recommend the Se-
curing of Loch Leven Trout
From Scotland.

A well-attended meeting of the Vancouver Island Fish and Game Club was held at the Tourist Association rooms last evening, President Charles Hayward being in the chair. A very interesting letter was read by Secretary Cuthbert from T. W. Lambert, M. D., of Kamloops, in relation to present conditions with regard to the preservation of game. He contended that the protection of salmon streams in the interior was as good as any in the fish of the province and that the fish of the streams in Lillooet and Chilcotin and other places where sheep are found, no means are taken to check the number of heads taken or whether ewes or lambs are spared. The Indians form large hunting parties in the spring and fall and slaughter all the deer they can find, the carcasses being left to rot and only the heads and portions taken. Dr. Lambert also asserts that trout fishing in the Thompson and the Kootenay rivers has fallen off, which he attributed entirely to the lumber mills being allowed to dump their sawdust into the rivers in question. He suggested that the real remedy lies in a system of supervision by the government in the appointment of a head game warden for each district with deputy game warden throughout the country. Upon the motion of S. P. Mills, K. C., seconded by E. Musgrave, the letter was received with thanks, the writer to be advised that the jurisdiction of the local club was confined to Vancouver Island, but that nothing would be done to assist the interior sportsmen in remedying their grievances.

The following report of the executive committee was adopted after some discussion, in which G. Hartung and S. P. Mills were the principal speakers:

The executive committee having met and considered the matters referred to them, especially the preparation of a programme for improving Shawnigan Lake, beg to report:

1. That advantage should be taken of the low state of the water in the mill stream at the outlet from the lake into the stream to remove obstructions which still are visible in the water across by the bridge at the outlet.

2. That your committee recommend the appropriation of \$100 for the foregoing objects.

3. That your committee having considered the report of Mr. Ferniehouse, and the statement of Mr. Babcock, fishing inspector, recommend that the question of obtaining dry to stock the waters and that the construction of a dam be recommended to the government, and that a provision be made to stock the stream for spawning purposes, and that the work of removing the obstructions in the principal streams and lakes of the Island may be carried out as soon as possible. The meeting then adjourned, it being announced that a meeting of the executive committee will be called at an early date.

TATOOSH REPORT.

Tatoosh, July 8.—8 p. m.—Cloudy; wind, eight miles. Inward—Steamer to Victoria. There is no one word to say in this report. On the contrary, salmon take a fly in our island rivers, even better than in any of the most celebrated salmon rivers in the world. The fish are fat, the trout are large, and salmon are destroyed, and one of the greatest sources of wealth in the country definitely thrown away for want of a little imagination.

Special efforts are to be made to increase the membership of the club, and also to secure additional subscriptions in order that the contemplated improvements in the principal streams and lakes of the Island may be carried out as soon as possible. The meeting then adjourned, it being announced that a meeting of the executive committee will be called at an early date.

AN ANOMALY.

The popularity of "Clack's Delight" (Tork and Beans) among campers is such that a party found without a supply of them would be a positive anomaly.

Newfoundlander Forty Years
Away From Civilization
Wishes to Settle Here.

Four people these days would care to take up a station involving a practical banishment from the comforts and pleasures incident to civilization for a period of nearly 50 years. Such, however, has been the experience of J. C. Leslie, who is at the Dominion on his first visit to the city. Over 40 years ago, Mr. Leslie entered the employ of the Anglo-American Telegraph Company, and came to Victoria in 1863. At that point of view the Kokolah was 10 years ago. The legal season is from February 11th to October 31st. There are also some grouse shooting districts. The name of the river is Salmon, and about seven miles long and contains salmon, sea trout, and brown trout. The market value from an American point of view is at the rate of about \$3,000 per week.

As you can anticipate that salmon fishing will continue to increase in value at the same rate it has been doing the past 20 years, a time will rapidly approach when

CHAS. HAYWARD,
Chairman.

The subjoined letter on the present condition of the Island streams with regard to their supply of fish, was also received:

"Mr. Munro-Ferguson has let Novar House, his place of residence, to the Earl of Derby for six weeks, from August 12th, at a rental of £3,500. This is the sum which the Duke of Argyle gets for Inverary Castle for the season."

The following may be of use and interest to you as it proves the immense value of sport at the present time. The sport on this estate was let for the whole of the season of 1890 for the sum of £1,050, and within the last few years of 20 years has more than doubled in value for one sixth of the season. This Atalung is a small river about the size of the Kestrel, and could not be beat in any part of the province when the Kokolah was 10 years ago. The legal season is from February 11th to October 31st. There are also some grouse shooting districts. The name of the river is Salmon, and about seven miles long and contains salmon, sea trout, and brown trout. The market value from an American point of view is at the rate of about \$3,000 per week.

As you can anticipate that salmon fishing will continue to increase in value at the same rate it has been doing the past 20 years, a time will rapidly approach when

Mill Shut-Down at
Vancouver.Directly Due to Strike of Bench
Hands At Planing
Mills.

Apropos of the announcement made by the Colonist yesterday morning in respect to the strained relations between the mill men at Vancouver and their employers, it is to be noted where salmon angling is to be obtained. It appears to me that it is worthy of an effort to protect what little remains for the benefit of the men and Vancouver exchanges.

The direct cause of the action taken by the mills is, of course, the strike of bench factory hands formerly working in the planing mills of the city, says the Vancouver Ledger. These men, a month ago, went out for nine hours a day with five dollars on Saturday, and the same rate of pay to prevail as before.

The mills have endeavored to continue filling orders for general assortment of building material for contractors in the city in face of big difficulties. They have been unable to maintain a staff of any completeness, for the reason that men engaged would find out that a strike was on and would not work.

The men who quit work in the mills, not only those who have gone on strike, but those who have refused to continue when they found a strike was on, have been getting employment as carpenters with the contractors of the city, and thus not felt the effects of the strike at all.

The mills will still run as usual, but the strike will be confined strictly to the mills. Most of the mills have heavy contracts with the Northwest and this will be continued. Shipping will also continue from those mills engaged in large capacity.

THE OLD ECONOMISTS.

One result of Mr. Chamberlain's throwing a fiscal question into the arena of Imperial politics has been to revive general popular interest in the study of political economy. In particular, the theories of the old orthodox economists have been resurrected, and they are found to be entirely different from the popular conception of them. Free-traders of the omnious kind, by that we mean those who rest in a dogma and as usual with virulence everything that appears to clash with their dogmatic beliefs, have always been firmly convinced that if the practical application of free trade was due to Cobden, its argumentative justification was to be found in the works of orthodox economists from Adam Smith down to John Stuart Mills. As a matter of fact that justification is not to be found in those writers at all, except in so far as they described an ideal interchange of merchandise, possibly only in a purely cosmopolitan society, a society that is, without national divisions. Cobden was purely and simply a cosmopolitan. The logical basis of his doctrine was not that a country might not obtain a selfish advantage by protective duties, but that it was not in the ultimate interests of humanity that it should do so. It is needless to say that it was not the logic of Cobden's position which converted Great Britain, the least logical and most patriotic of all countries, to free trade. The doctrines of the Manchester school involved a similar conclusion as to war. Obviously, war is not a thing for the general advantage of the human race, but for the particular benefit of the winning combatant. Consequently the Manchester school proposed to abolish war at the same time as they abolished protective duties. When, however, they came to put this doctrinaire theory into practice by disarming Great Britain, Great Britain found their logic much too strong for her stomach. It was not, therefore, Cobden's logic which converted Great Britain to free trade. If it had been it would have deprived the country of army and fleet as well. Great Britain was converted by the facts of her own position. She was developing a colossal manufacturing industry, and needed cheap bread. She saw in free trade a means of cheapening bread, and thus stimulating manufactures. Cobden's policy was put in practice, but his theory was never accepted, never could be accepted as long as nations remain separate entities in civilization. Now the exigencies of Great Britain are driving her in another direction. If she is convinced that it is to her interest to go in that direction, Cobden's logic will disappear from her path like a straw before a cyclone. Great Britain is beginning to question the advantages of manufacturing cheaply when the articles manufactured are being gradually closed out of her accustomed markets. She is finding also, that the protected manufacturers of foreign countries are invading her home market. Cobdenism, Great Britain thinks, should be justified by results, as well as deduced from a cosmopolitan theory of civilization. A civilization from which cosmopolitanism and Great Britain would be equally eliminated does not appeal to her as satisfactory, and it does appeal as the only practical result likely to be achieved by her continuance in her present course.

THE VALUE OF RETICENCE.

There are some people in this world who pride themselves upon their lack of reticence. They look upon their disposition to shout out everything that concerns themselves, their neighbors and public events from the rooftops as a virtue. Reticence has to them not merely no value, but they regard it in some ways as an actual defect of character. Such people may be excessively high minded and transparent, but they are uncommonly disagreeable and difficult people to get along with. The censure on which they pride themselves is nearly always malicious in result, and not seldom it is malicious in intention as well; while at the best, it is apt to develop into gossip, talebearing, and scandal mongering, the most repulsive and the most common of human vices. Both charity and prudence often demand a wise reticence, and the power to withhold the tongue is as often the indication of a wise mind as of a fussy one. An almost forgotten story is told of Lord Tennyson's father, which aptly illustrates the point. The story is in regard to the murder of the Emperor Paul of Russia, of which Browning wrote those wonderfully grotesque lines that so puzzled Stalkey & Co. Shortly after the murder, Mr. Tennyson was dining with Lord St. Helens, then British ambassador, in Moscow. At table were several Russian officers of high rank, whose names he did not know. During the meal, a guarded reference was made to the death of the Emperor Paul of Russia, of which Browning wrote, "Why do you speak so gingly about a matter so notorious?" cried Tennyson, impulsively, leaning across his neighbor, a Russian, who wore a profusion of orders. "We know very well in England that the Emperor Paul was murdered. Count Zoboff knocked him down, and Bennington and Count Paloff strangled him." There was a moment of strained silence, then the Ambassador abruptly changed the sub-

ject. As the guests were leaving the table, he contrived to whisper to Tennyson: "Don't go into the next room, but stay for your life. The man next you, across whose breast you leaned, was Count Paloff, and Zoboff was also at the table." Needless to say, the advice was taken. Tennyson flung his clothes into a portmanteau, and fled behind fast horses to Odessa. Here, after he had lain in hiding for weeks, he was smuggled, in the disguise of a servant, on board an English vessel. Here at least is one man who received an object lesson in the value of reticence, which should have been of lasting benefit to him. But lessons are largely wasted upon persons who pride themselves upon their defects. Save us from the man who plumes himself upon always "speaking his mind," and from his cousin "the candid friend." What an immense amount of mischief these two individuals have accomplished in the history of the world, and what an immense amount of mischief they daily continue to accomplish! With what complacency they pursue their malevolent way, sowing discord and alienation as they pass! We do not require to stint language in describing these people, because they are armored in their inability to recognize themselves in the description of their qualities.

EX-GOVERNOR ROSS.

Ex-Governor Ross we observe, has returned to Ottawa. We presume that one of the uses he will make of his restoration to health will be to make a vigorous protest against the measures taken by the government in connection with the Treadgold concession during his enforced absence. It is rather an unfortunate dispensation of Providence that the people of the Yukon should have elected a representative to Ottawa who has been prevented by ill-health from carrying out his pledge to sustain their cause in the matter of this ignominious concession, who has been obliged in the language of the Times to "foster his physical resources" at the very time when the resources of the Yukon were being squandered by a prodigal and unsympathetic government. The Yukon Council has been gaged and ex-Governor Ross has been traveling for his health, so that the voice of the Yukon has been heard neither directly nor indirectly at Ottawa. It must be an agonizing reflection to Mr. Ross that the delicacy of his health has prevented him from accomplishing the duty he pledged himself to perform. He has been unable to prevent the government from being influenced by sinister arguments representing that the Treadgold concession is for the benefit of the Yukon. He has even been obliged to pass over in silence the allegation of his own election as a proof that public sentiment in the Yukon is in favor of the Treadgold concession. We cannot imagine any more terrible penalty which ill-health could exact from a conscientious public man. So are they all, all conscientious public men. Meanwhile, without elaboration, the Yukon has not been delivered from the Treadgold concession and Mr. Ross has recovered his health to late.

A BRIGHT PROSPECT.

"It is true," said the Times on Tuesday, "our Fraser river fishermen are threatening to 'go out,' but that is an annual event, and is not likely to have a prejudicial effect, as the canners can secure a supply from the traps on the American side." This is what the Times calls one of the "brightening prospects" of British Columbia. We think that without straining our vocabulary we could find another and more appropriate name for it. The Dominion government places restrictions upon the catching of salmon in British Columbia, which prevents the canners from putting up fish in competition with the American canners, and at the same time paying sufficient remuneration to the men who have to employ the cumbersome and expensive methods alone permitted in Canadian waters. The annual wrangle over the price to be paid for fish is not the fault of the fishermen. Like hand loom weavers when machinery was invented, they are compelled to meet unfair conditions of competition. Nor is it the fault of the canners. They have to compete in the world market against fish which cost their competitors a great deal less than those they handle themselves. In a word, the industry as carried on in British Columbia is at a distinct and heavy disadvantage as compared with the industry as carried on the other side of the line, a disadvantage which it is prevented by the government from overcoming. This condition of affairs is represented by the Times as a "brightening prospect" for British Columbia, because fish, which cannot be economically caught in Canadian waters, can be economically caught from American traps. The extinction of the salmon fishing industry, the dependence of our canning industry upon the ability of foreigners to capture fish running to one of our own rivers, truly this is a "brightening prospect" indeed. There are some people so congenitally bad-tempered that they cannot see where they are going, except in the dark. If the fishermen disappear how long would it be before the canners disappeared also? If our American competitors controlled the supply of fish, would they continue to submit themselves to the inconvenience of Canadian competitors? We know not. The only possible remedy is to secure fish as they can be secured in American waters, and that could easily be done if local jealousy and foreign lobbying were not actively interested in preventing it.

So far only partisans on one side or the other have delivered their opinion on the Gamay charges. There are several by-elections coming off soon at which people who are not partisans will register their opinion on the all-absorbing topic.

A very valuable bulletin has been issued by the Provincial Bureau of Information on the markets of the Pacific for wood pulp and paper. It contains a vast amount of carefully compiled information. It is distinctly creditable to the secretary of the Bureau, Mr. Gosnell, and is likely to be most serviceable to all interested in the establishment of this industry in British Columbia.

The Japanese are reported to be gaining more and more influence over the Chinese government.

Whitaker Wright now declares that he wishes to return to England and stand his trial, but that he objects to being compelled to return.

We cordially endorse everything said in the Times last night about the desirability on every ground, of all the persons entitled to vote in Victoria City registering their names with the collector of votes without delay.

We are sorry that there appears to be some men in British Columbia who cannot apprehend the difference between "personal" and "party" politics. Save us from the man who plumes himself upon always "speaking his mind," and from his cousin "the candid friend."

What an immense amount of mischief these two individuals have accomplished in the history of the world, and what an immense amount of mischief they daily continue to accomplish!

With what complacency they pursue their malevolent way, sowing discord and alienation as they pass! We do not require to stint language in describing these people, because they are armored in their inability to recognize themselves in the description of their qualities.

The voters' lists will be closed and permanently on the 14th of August. Persons entitled to vote who neglect to register their names before that date, cannot vote at the next provincial election.

It is a curious and remarkable thing about the newspaper business that if a single line of newsprint is printed in an obscure corner of a paper affecting some individual, that individual is certain to see it, and if he does not like it, to be at the newspaper office the same morning to object. On the other hand, newspapers can print in type an inch long what intimately and particularly concerns everybody, and a number of people will be found to overlook it. If we were to print this morning in the smallest type the simple line "John Jones drank too much last night," and hide it away in our columns as ingeniously as we could, we would before 11 a.m. have as many wits raised against us as there are John Joneses in the community. But we might print in red ink diagonally across the front page of the Colonist, "Register your vote," and numbers of people would still be found on election day who, through sheer carelessness, had neglected to do so, and who would be inclined to blame the newspapers for not having informed them of their duty.

LETTERS TO THE EDITOR.

THE RELEASE OF LADY SMITH.

Sir, I desire to make acknowledgments of the following donations in response to my appeal for the people of Ladysmith:

Vancouver

Geo. Ambrey \$5.00

Rev. N. N. Powell 7.00

"Aldi-Federation" 30.00

S. F. Bacon 1.00

R. 2.00

Other Points.

Ralph Smith, M. P. \$5.00

H. M. New Westminster 2.00

Rev. Dr. Rose 1.00

This is the amount to date for which the writer is very thankful. It is sufficient to indicate at any rate lines of sympathy and the amount of money that has been given to the relief of the people of Ladysmith.

The amount published by you today on "Methods of Fishing" the writer does not consider an expert testimony, is sufficient to indicate a large and probably successful business. Any amount given to the relief of the people of Ladysmith will be gratefully received.

Y. C. HERRINGS.

Sir, This being the 5th July, the day above all others that a fisherman can be excused for doing rash things, you will permit me to excuse me for my temerity in rushing into print in defense of the legal representation of the king of the fish.

It is the opinion of the writer that today on "Methods of Fishing" the writer does

not consider an expert testimony, is sufficient to indicate a large and probably successful business. Any amount given to the relief of the people of Ladysmith will be gratefully received.

Ask for "Grandas" and look for Manana the Spaniard on the box.

BASEBALL
There will be a surprise in store for those who witness Friday's game against Everett—and that will be Chase's pitching. His delivery is most peculiar one, and the way he mixes up his fast and slow ones is a revelation, having at times speed to burn, and then, with the same motion, he flings them over with the most tantalizing effect, while during the season, catches and throws very well, and is fast on the bases. He and Chase composed the battery for the innings against the Fernwoods in a practice game last evening, and their work was a pleasure to watch.

In connection with the games with Everett on Friday and Saturday, the fans are twisting their thinkers on a grave problem of logic, the question they seek to answer is, If Everett beat San Francisco, the league team at Everett by 6 to 4, which happened, and San Francisco then put it all over the Seattle Pacific National League team by a score of 7 to 1, if Victoria succeeds in getting away with Schock's cherubs, where does Seattle and San Francisco league teams lie? And still another point of logic is worming its way through the fan's thinker—if Everett beats Victoria, how will Victoria's fight begin with the rest of the league team which hit the dust before Schock's dandies?

The Victorians expect to hold their own, for the team is now stronger than it has been for some time. The return of Schwengen to the game and the addition of Whalen, both good batters, and with good stickers like Rither, Smith, McConnell and Chase, makes the team a very heavy hitting one. The players will be 300 per cent, or over, with under 1000 feet others to keep the safe hits scattered. The Everett team will have Lent in the box to-morrow's game, and on Saturday Schenk and Emerson will do the pitching.

The game on Tuesday evening at Oak Bay between the Law Students and the Oak Bay baseball aggregation was one of the best games of its class played during the season. After playing 11 innings, the latter managed to win by one run, the score was 7 to 6.

The Law Students in the first innings had the best of it, slanting their opponents out and managed to score. In fact right along to the fifth they had the best of it. The sixth and seventh saw the Oak Bays buck up and pull even, and there the score stood until the eleventh innings.

The Esquimalt and Capital City Intermediate baseball teams will play on Saturday afternoon. Where the match will take place has not been decided on yet. The Esquimalts will be as follows: Annett, catcher; Potts, pitcher; Whenuy, first base; Lynch, second base; A. Thom, third base; McArthur, short stop; T. George, centre field; S. Doran, left field; J. Dugan, right field; Rollo and Beatty subs.

The Capitals will be picked from the following: F. Cullin, J. Ross, J. Lorimer, T. Allen, D. Sinclair, W. Northcott, E. Whyte, C. McDonald, B. Johnson, F. Hanley, J. Renfrew and W. Edwards.

The Weiler Bros. baseball team turned down the Cullinan & Mitchell fans at Beacon Hill by a score of 10 to 1.

It has been learned on good authority that there is a movement on foot to form another Senior baseball team here. It is not definitely known yet if there is any one backing the movement, or who is the principal mover in the affair. Rumor says that W. H. H. Jones, J. Holness, McLean, Barnwell, G. W. Houle, A. Gray, A. Shanks will be members of the team. If the scheme matures, a couple of players are to be included.

The Law Students baseball team have the following games booked:

Friday, 10th, United Banks.
Monday, 13th, Oak Bay.
Tuesday, 14th, Oak Bay.

Wednesday, 15th, Simpson's team.

Friday, 17th, Challenor & Mitchell.

The students expect to bring a game off in Vancouver on the 25th of this month with the Law Students of the Terminal City.

CRICKET.

The match played yesterday afternoon at the Barracks Canteen ground, between the Navy and the Royal Engineers, resulted in a win for the latter

TRADES AND LABOR ELECT OFFICERS

Socialist Wing Succeed in Capturing Control By a Close Vote.

An unusually well attended meeting of the Trades and Labor council was held last evening. It was 9:30 before the secretary started to read the minutes, an hour and a half being occupied in discussing the admittance of delegates from the Millmen and Lockmen's unions chartered by the American Labor Union. The delegates from these unions were seated.

The election of officers for the ensuing term of six months, resulted as follows:

President—J. C. Watters.

Vice-President—A. E. McEachern.

Secretary—Christian Sivertz.

Treasurer—O. L. Charlton.

Secretary—O. L. Charlton.

Executive Committee—J. C. Watters,

F. E. Dungarfield, A. D. McLaughlin,

F. T. D. Hodges, C. Sivertz.

The actions of the council in admitting the two unions from the American Labor Union, and the election of Socialists for the chief offices, demonstrates the fact that the Socialists have control of the Trades and Labor council.

The election of officers were received from the following:

Labourers' Protective Union—Allan Jeeves, vice J. C. Mapleton, resigned.

Amalgamated Society of Carpenters and Joiners—J. W. Bolden, J. B. Martin, W. F. Fullerton and A. E. McEachern.

Machinists' Union—August Herberger and John Mathew.

Chambers' Union—Joseph Russell and Wm. Ed. Keown.

Typographical Union—P. H. Twiss, J. Clow, Geo. Coldwell (alternate).

Painters and Decorators—R. Ryan, A. Tripp and F. Henkni (alternate).

Retail Clerks—J. H. Smith, vice W. A. Smith.

Millmen—F. D. Hodges and F. T. Dungarfield.

Hack Drivers—F. E. Dungarfield and J. A. Freeman.

Garment Workers—Mr. Herbert.

Secretary Sivertz in his report, stated that there were 25 unions affiliated with the council, aggregating 57 accredited members. The balance sheet showed the receipts for the year were \$351,54, and the expenses \$12,163 in balance.

The civic representative committee reported that the City Council had not seen fit to appoint either of the gentlemen whose names had been submitted for representation on the Provincial Jubilee Hospital board.

The secretary of the B. C. Fishermen's Union, Vancouver, wrote asking that fishermen wait till the present trouble with the Indians is settled before going to the Fraser.

The Journeyman Barbers' Union wrote protesting against the time of the council being taken up discussing politics and Socialism. The barbers threaten to withdraw their delegates from the council unless the council live up to its constitution.

The Typographical Union wrote protesting against the discussion of politics and Socialism in the Trades and Labor council, and suggesting the passage of measures to keep the council clear of partisan politics. The communication was laid on the table till the first meeting in August.

The meeting adjourned till Wednesday night.

DOUGLAS GARDEN ATTRACTIONS

Fine Programme Was Given at This Delightful Pleasure Resort.

The attendance at the Douglas Summer Gardens last evening, though fair, was not in keeping with the excellence of the entertainment provided. A visit to the gardens will convince anyone that it is an attraction deserving of generous patronage. Few critics can boast of such an ideal resort for popular summer evening entertainments. The sloping lawn with its large and beautiful oaks, its shrubberies and well-kept paths, is decorated with strings of variegated Chinese lanterns, resembled a scene from fairyland. With the excellent programme that have been presented, it is strange that there has not been better appreciation on the part of the public by attending in greater numbers. It is true that the evenings have been somewhat chilly, but patriotic enthusiasm should have induced more people to assist such a laudable enterprise to provide pleasure alike to citizens and visiting tourists.

The Fifth Regiment band played a fine programme of excellent selections. Sappho's overture, "Morning, Noon and Night," was given a spirited rendition, and the selection from Julian Edward's comic opera, "Princess Chic," was also highly appreciated. Mr. W. North again played a pretty cornet solo, "Violets," and the other selections were equally attractive. Mr. Frank Leroy, in his illustrated song, "The Altar of Friendship," was heartily cheered, this catchy melody, by the authors of "Be a Man Always," having attained considerable fame popularly since its introduction. The棒子歌 presented some very laughable moving pictures, which created much amusement among the young folk.

It has been decided not to hold another entertainment at the gardens until Saturday evening, when a specially fine list of attractions will be given. The grounds will be illuminated with fire-works, the regimental band will render a particularly good programme, and the moving pictures are to be on, or the arranger may make an effort to please on the part of the management, there will be no excuse for people not attending.

Help the Douglas Gardens entertainments along, for they are a distinct benefit in every way to the city, and if properly patronized, new attractions can be added from time to time, until it becomes a pleasure resort, which tourists will long remember after visiting this

young folk.

TRY SECOND MARRIAGE.

Statistics gathered by the New York Journal of Health show that widowers of all ages, even those like the less kindly to a second dose of single blessedness than do widows. Of the total number of persons seeking the matrimonial state in the standard year the bereaved ones of both sexes made up one-tenth of the list and the widowers outdid the widows to the number 556. Since the reports of the band deal solely with indisputable facts and leave debatable theories to the speculative mind the inquiry of the diversity in ages. He finds in it various sources, but the consulted disagree. However, the preponderance of testimony indicates that woman, by the sweetness of her disposition, contributes more materially to a man's happiness than he does to hers, and that having lost one spouse, he is never satisfied until he finds somebody else like her—Chicago Tribune.

An intelligent physician would prescribe a tonic and blood cleanser, but that before pills can be cured the system must receive a thorough purification.

There exists no better remedy than Ferrozone, which destroys all unhealthy bacteria present in the human organism. Polluted blood is made strong and pure. The cause of the pimples is removed and they quickly disappear.

When the blood has become impoverished, Ferrozone acts very promptly in restoring the richness and strength.

It contains the kind of nutrient that forms healthy blood, thus giving renewed vigor to every part of the body.

The tonic and purifying properties of Ferrozone combine in making it a stimulating, flesh-forming restorative. It's good for the weak and run-down, and accomplishes very marked results in all diseases of the nerves, stomach, kidneys and liver.

Miss Evelyn Chesterfield, of London, says: "I have found Ferrozone a priceless remedy for humors and pimples. It cured me of bleeding lumps on my face, and improved my general health."

Ferrozone has the largest sale of any tonic in America, because it possesses unusual merits and virtues. Price, 50 cents per box, of six boxes for \$2.50, at all druggists, or by mail from The Ferrozone Company, Kingston, Ont.

Ferrozone assures health.

ENFORCING THE IMMIGRATION ACT

Good Work Being Done in Exclusion of the Japanese Laborers.

During the period between the 14th June and 1st July, G. A. Calbeck, deputy immigration officer for New Westminster, and his staff, of the Fraser, made the return of 100 Japanese to the United States. The great majority of these were seeking to enter British Columbia by either walking over the numerous highways leading from the boundary to the Fraser, or by rowboat from Point Roberts. It is reported that the latter route is a favorite method of entering the province without reference to the immigration law, and that \$10 per head is being charged Japs for the passage. A close watch is being kept upon them at this point.

From 29th May to 29th June, Deputy Officer Lane has turned back half a hundred at the boundary at Sumas, who came to that point by train, while half a dozen have been sent back from Vancouver, and the latter could not be reached.

At Victoria there are virtually no arrivals by the Sound and San Francisco steamers, and very few by the direct steamers from Yokohama. The only exception during the past month was the S. S. Shawmut, which had 27 ticketed to Victoria. Five of these complied with the act, and 22 sailed for San Francisco, the last arriving last night, when they were kept under surveillance and their passports retained in the interim.

The government are determined that the Immigration Act shall be strictly enforced, as far as it is possible to do so, and it is keeping Officers Calbeck and Kirkland very busy along the boundary.

The great attraction for the Japanese is the fishing season, and the fact that they are kept under surveillance and their passports retained in the interim.

Programme For The Fall Fair

Outlined At a Meeting of Board
of Management Last
Evening.

Splendid Progress Made To-
wards Ensuring Success
of Exhibition.

At a regular meeting of the Board of Management, held at the British Columbia Agricultural Association hall yesterday evening in the City Hall, the report of the executive committee, outlining what has already been done towards arranging for the success of the forthcoming annual fall fair, and containing a draft programme was presented. It proved a very interesting document, and was unanimously adopted.

His Worship, Mayor McCandless, president of the association, and those who were also present, Ald. Yates, W. Lepine, Ald. H. D. Helmick, L. C. Watson, Clarke, M. Baker, R. Scantling, W. J. Hanna, Hardress, Clarke, F. Olsen, F. Scie, J. Shipland, G. F. Higgins, Lawrence Goodacre, James Christie and B. C. Moore.

Minutes of the last meeting having been read and adopted, the secretary read the executive committee report, which was as follows:

At a meeting of the board of management, held in the City Hall, a committee, acting with the City Collector, reported on the constitution, recommending that at the next annual meeting of the B. C. Agricultural Association the board of management be reduced to five to include His Worship the Mayor, Ald. Yates, W. Lepine, Ald. H. D. Helmick and two by the British Columbia Agricultural Association, this board to have the full control of the affairs of the Association and the appointing of all officials. And in the meantime, a committee of one or more members from its members and executive committee constituted as above, who shall have the same powers until the next annual meeting of the Association."

This was passed by you unanimously, and the following members were elected as representatives to the Association: By Tolmato and Mr. M. Baker, Ald. J. S. Yates and Mr. Fred Norris were appointed as representatives of the City Council on the executive.

On May 13th your executive committee, after a long discussion of the preparations for the position of secretary, as a result of which Mr. Robert H. Swinton was appointed.

The executive have appointed committees as shown on memo, "A", attached hereto.

The prize committee, consisting of

Mr. Le Poer Trench, expressed the hope that before final arrangements were made as to placing the exhibits, the districts would be consulted in the matter. He was assured that the districts would be consulted.

A brief discussion ensued on a question raised by Mr. Moore,

the desirability of including among the exhibits for which prizes would be offered, dressed poultry. He explained that heretofore the society had not given prizes for such exhibits.

The matter was left in the hands of the prize committee, and the meeting adjourned.

As before mentioned, the report was unanimously adopted, it being considered excellent.

Mr. Olson expressed surprise that no special committee had been appointed to deal with agricultural and horticultural exhibits.

Mr. Baker assured him that those two important branches would receive every attention.

Mr. Olson expressed surprise that no special committee had been appointed to deal with agricultural and horticultural exhibits.

Mr. Baker assured him that those two important branches would receive every attention.

Mr. Le Poer Trench expressed the hope that before final arrangements were made as to placing the exhibits, the districts would be consulted in the matter. He was assured that the districts would be consulted.

A brief discussion ensued on a question raised by Mr. Moore,

the desirability of including among the exhibits for which prizes would be offered, dressed poultry. He explained that heretofore the society had not given prizes for such exhibits.

The matter was left in the hands of the prize committee, and the meeting adjourned.

As before mentioned, the report was unanimously adopted, it being considered excellent.

Sealers Make Good Catches

Florence M. Smith And E. B. Marvin Complete Another Cruise.

Cutters Ordered to Keep Close Watch on Schooners in Behring Sea.

Cable messages to the Victoria Sealing Company tell of the catches made by two of the schooners of the fleet hunting off the Falkland Islands and in the vicinity of the Horn. The Florence M. Smith and E. B. Marvin, both of which vessels went from Victoria to Cape Horn, have shipped their catches to Lampson's in London. The Florence M. Smith took 998 skins off the Horn, and the E. B. Marvin took 1,371 skins during the season just closed. The schooners, which are now refitting at Port Stanley, have been a year away from Victoria, and in that year they have taken 3,680 skins. The E. B. Marvin, which was commanded by Capt. Anderson of this city, taking 3,571, and the Florence M. Smith, of which Capt. Matt Ryan of Victoria is master, has taken 2,109. The catches of the two schooners during the year, they have spent off the Horn, exceeds the catch of the fleet of 12 vessels which went to the Behring Sea last season.

There are five other vessels hunting off Cape Horn, in all of which Victoria sealers are interested. The fleet, which has not yet reported, is composed of the Edward Roy, Beatrice L. Corkum, Ola M. Balcom, Florence M. Munson and another vessel.

The majority of the fleet which will go to Behring Sea has now sailed and is making for the Northern sea after shipping crews on the Island Coast. During this season—according to advices from Washington, the United States government intends to harass the sealers in every possible way. In this connection the Washington correspondent of the Far Trade Review says: "Advices received at the Treasury Department are to the effect that the American patrolling fleet left Dutch Harbor, May 15. As above stated, the Manning has started on her cruise among the Aleutian Islands. The Thetis has gone to Point Barrow, while the Bear has sailed direct to the Pribiloff Islands. The Perry, Rush and McCulloch are still in the North Pacific, but after August 1 the entire fleet will go into Behring Sea. This will be the larger number of patrolling vessels in Behring Sea this summer plan for any season in recent years and it is expected that the presence of so many steam cutters will restrict the operations of the pelagic hunters to the waters entirely outside the 60-mile zone. It is well understood that last season considerable pelagic sealing was done within the zone after the beginning of the closed season on August 1, a fact attributed to the dense fogs and rough weather which made impossible the operations of the waters of the zone with the small force at command. The reports referred to in these despatches two months ago to the effect that arrangements have been made to fit out several Canadian schooners with firearms, ostensibly for the purpose of hunting seals in the Japan sea, but in reality with a view to taking skins in the eastern part of Behring Sea, have induced the Treasury Department to take special precautions to prevent violations of the zone. In seasons past the commanders of revenue cutters have been directed to use considerable discretion and diplomacy in the treatment of Canadian sealers, and to avoid making seizures where a word of warning would suffice. This year, however, the revenue cutters will seize every vessel flying the American or British flag that may be found in Behring Sea before August 1, or within the 60-mile zone thereafter, with sealing paraphernalia on board."

THE ARDNAMURCHAN.

Vessel Which Caused Flurry When Carrying Salmon, Sails South.

The British ship Ardnamurchan passed out yesterday from Blakeley with lumber for Valparaiso. She is the vessel which a few years ago was forced to jettison part of her cargo of canned salmon of C. Flattery, and when numerous cases were washed ashore on the Oregon Coast great fears for the safety of the vessel were manifested and heavy reinsurance was paid by the underwriters. On her present voyage to Puget Sound the Ardnamurchan has attracted considerable attention through the fact that her master refused to employ stevedores to load his vessel with her lumber cargo and stowed his cargo with the crew of his vessel.

A COMPARISON.

United States Shipping Paper Relates Disadvantage of American Ships.

In a comparative article showing the advantages derived by British shipping over that of the United States, the American Steam and Shipping, after detailing the comparative cost of building and operating ships flying the red ensign and the starry flag, says: "The American ship disappears from the ocean. We are compelled upon foreigners to do our carrying trade, and while the situation is realized by a few, the vast majority of the American people are blind to the peril involved in such a condition of affairs. A great European war, by suddenly withdrawing from our trade the foreign vessels which do our carrying, would check at once our import and our export trade. The industrial collapse which would follow would be a heavy price for the country to pay for its sluggishness in permitting our ocean trade to pass entirely into the hands of foreigners."

MARINE NOTES.

When the steamer City of Tepeka was preparing to leave Port Townsend yesterday for Alaska, it was found that her chief cook was missing. His absence was not discovered until early this morning when preparations for breakfast were commenced. It was impossible for the Tepeka to proceed without such an important and necessary a person as this. The steamer waited until the cook arrived from Victoria.

Steamer Aurora is expected to arrive this morning from Skagway. She arrived at Vancouver yesterday afternoon with 50 passengers from Lynn Canal. When she sails North again—she is expected to leave tonight—she will have about 100 tons of groceries and general supplies shipped by local wholesalers for Dawson.

THE WEATHER.

Meteorological Office, Victoria, July 8, 8 p. m. SYNOPSIS.

The summer type of high barometric pressure now covers this province and the adjoining States. It will probably cause a series of warm weather through the Pacific Northwest. No rain has fallen since the Rockies, with the exception there have been heavy showers. A warm east wind prevails on the Coast of California and the winds are moderate.

THE SAN FRANCISCO LINERS.

Two Excursions Arranged for August 1. Tickets Good for Two Months.

Steamer City of Puebla, which reached port early yesterday morning, brought a large number of passengers, 235 in all. She had an average cargo of 110 tons was landed at the Ocean docks. The steamer Umatilla sailed last night for the Golden Gate, carrying a good complement of passengers. Those who embarked at this port were: H. T. Chapman and wife, A. H. Guthrie, H. Johnson, Mrs. A. E. Smith, Lillian Smith, Mrs. W. J. McGee, Miss McGee, A. Queter, W. Gage, H. K. Smith, Mrs. H. Mansfield, Miss E. Wintrel, Miss L. M. Sylvester, Mrs. L. Wingate, Miss M. West and Mrs. Johnston.

During August there will be two round trip excursions to San Francisco by the Pacific Coast company's steamers at reduced rates—a fare of \$25 being charged for the round trip. The excursions are arranged because of the meeting of the National Encampment of the Grand Army of the Republic, which meets at San Francisco from the 17th to the 22nd. The tickets will be good for return within 60 days. The first excursion will be by the steamer Umatilla, sailing on August 7, and the second on the steamer City of Puebla, leaving here on August 12.

PORTLAND IN ICE.

Nome Liner Was Fast in Floe For Eight Days.

Steamer Portland, which has returned to Seattle, the Nome, reports that during her trip North she was fast in an ice floe. Her voyage North was without incident until May 31, when 135 miles northwest of Nunivak Island, where she first encountered the ice floes. The ice worked its way under the vessel and for a few days the Portland was out of the water, officers, crew and many of her passengers working night and day to free her. She drifted nearly all of the time, and on June 18 was 70 miles from Nome and broke away from the ice. All over the ice floes were huge rents through which the water gushed.

A number of mushers aboard the vessel were of great assistance to the officers. Joe Palmer, a well known prospector, and Bob Staples, another pas-
